# THE BEST MOTION PICTURES AND WHERE TO FIND THEM

## Acrobatic Adventures of Moving Picture Camera Men

Tumbled From Perches, Driven From Roofs, Charged by Cavalry, the Way of the Photographers at Wilson Inaugural Was Hard-Cameras Lost in Scuffle. Plump Venus Serves as a Buffer-A Bulldog a Foe to Art.

inauguration in Washington were some of the camera mon from the various moving picture companies. And by the same token the most bedraugled

by the same token the most bedraugled lot of inaugurationiats were these operators upon their return to New York.

Charles Travers, chief camera man of the Universal company, was about the sorriest sight of them all, with his face scratched, hat punctured and garments ripped.

"It wouldn't have been so bad." sald Travers. "If I hadn't lost a couple of perfectly good teeth and a brand new camera in the fraces. I had planted the camera on a corner that gave me a fire view of the capitol grounds. There I was complimenting myself and breathing ensier than I had at any other time during the day, when a howling mob burst through the police lines and fairly lifted me skyward. When I landed on terra firms again I was feeling about as fit as a fellow who has been taken from the prize ring after a good walleping.

"As soon as I could pull myself together I looked about for my camers. I found a small place of the box, but that was all. Imagine my predicament: The parade almost ready to start and not a sign of a camera to work with. Luckily, my hotel was only a short distance away, and I rushed there for another camera. On the way some nice, finify young person gave me a savage peke with an ambrella."

Some of the other camers men had aqualy as thrilling experiences. One of them as the roof, and the photographer was dragged off to the station house without even having a chance to explain.

His Tourser a photographer for the

PEXT to president Wilson bimself | knocked him into the arms of a middle perhaps the busiest men at the aged woman who weighed about 100

"Frather bed!" he cried, and the fat woman handed him one on the other side of his fare that sent him spinning. In the Arms of a Protecter. "Gee!" said Sousay, "that's no way to treat a guy who is looking for protec-tion."

"Rats" exclaimed the fat woman.
And Sousay, observing that she was in no mood to jest, picked up what remained of his camera and disappeared.
Later, when Sousay met a number of other other photographers in a cafe one of them showed him a picture of himself in the arms of the fat woman.
Travers tells one on another of the Universal camera men who scaled a couple of stories of a lodging house and comfortably seated himself in a window ready to take pictures.

"Some one discovered him there," said Travers, "and sicked a building on him. The way he crawled down from his perch was a sersam. There was never anything in the comte films to beat it." Rats" exclaimed the fat woman.

PICTURE CAMERA

AS A DETECTIVE Diacovery of Pickpockets at Innugura-tion—Attempt to Swindle Street Car Company Revented.

'The first demonstration of the possibilities of the moving picture in criminai investigation which came to my
notice," said detective William J. Burns,
"was during my connection with the
secret service bureau in Washington.
The inauguration like every large public event, attracts a lurge number of
crooks who ply their trade among the
unsuspecting. As a matter of fact I
have just returned from Washington,
where I had a score of operatives on the
lookout for pickpockets and other representatives of the nimble fingered
gentry.

was dragged off to the station house without even having a chance to explain.

Billy Touper, a photographer for the Animated Weekly, joined a small army of New York camera men on Pennsylvania avenue just before the paradestarted. Thinns were going a little too slowly for Billy, so he thought he'd steal a marsh an the others. Bucking the crowd and planted his camera aguarely in the center of the avenue. A troop of cavalry came along about this time, and just as poor Bill was about to press the bulb he was caught in the whirl and sent scurrying to the sidewalk.

"Believe me," he told the others later, "it's no fun being stepped on by a bunch of soldiers. Those fellows wouldn't stop if a freight train passed in front of them."

What burt the camera men more than anything eise was the fact that the paradestalors than the ordinary apparentations showed them no more consideration than the ordinary apparentations.

There were passes to get the nimble fingered sentry.

"at the particular inauguration of the street near the president's conveyance, where the parade halted He caught my eye and and waved his hand. A few minures had relieved him of his watch. Some weeks later my friend came to me and wald that he had attended an exhibition of the moving pictures of the linauguration parade. He saw himself further, he sat through a second performance and was able to get a full description of the man whom he suspendent. I asked him if he had occupted in the stand other than the section in which I saw him. He respired that he had not. The result was the man whom he described was arrested shortly afterwards and the watch was secured.

Enlimited Field.

Unlimited Field.

ase. The company then knew that a suit was certain.

"The boy was kept indoors for weeks and when he finally appeared with his diarmales, were an tron brare on his eg. Meanwhile a large damage suit and been brought, with the allegation hat the boy was injured for life—that he would always be a cripple and could not dispense with the brace.

"For various reasons the railway company concluded that the injury had been greatly exaggerated. A moving alcture camera man was commissioned to visit the boy's neighborhood and covertly photograph him at play. The dan succeeded admirably. The boy saithfully followed parental instructions to avoid cameras but, unmindful of the moving picture machine, engaged in all manner of rough sports while his discarded brace rested on the round.

A Bomb Shell in Court Room.

"The picture was projected in the court room and a near panic resulted. The father lost all thought of the suit in a denunciation of the boy. Naturally the case was dismissed."

## The Most Daring of All, the Film Drama of the Air

Popularity of Aviation on the Screen Is Said to Be Un equalled by Any Other Scenario-Licensed Pilots May Work For Picture Films-Photographers Take Many Hairbreadth Chances.

WF YOU happen to see a launch explede in Great South Bay and Imof an exceedingly comely young woman by the aviator of an aeroplane
which has been hovering over the
launch—don't be glarmed. Yes, the
young man who dived headlong from
the aeroplane is an aviator and may
be licensed by the Aero Club of America, but that circumstance necessarily
doesn't bar him from seeking employment with a moving picture firm.

If he sees fit to spiral up to a point
just above the sintute of Liberty and
then to leap from his machine with a
parachute in order to calch an ocean
liner which is sailing to Europe with
the villain aboard, don't call him footbardy. It pays well in the moving picture "game."

If you see a great crowd around a mediately after witness the rescue

bardy. It pays well in the moving picture "game."

If you see a great crowd around a torn and bleeding body in the Mall of Central Fark and the fragments of a wrecked aeroplane near by, don't jump to a hasty conclusion. The aeroplane was wrecked six months ago and the "dead" aviator will prescatly rise and wash the ghastly evidence of his fall from his mangied face.

Now that aviation has appeared recently to be so nearly dead in this country—thanks to our semnolent government—the birdmen have taken to posing for the motion picture machine. Indeed, they are doing a little picture work themselves.

Harry Bingham Brown, A. Leo Stevens, George W. Beatty, Antony Jannes, Phillip Ward Page, Frank T. Coffyn, Robert G. Fowier, Lieut, H. M. Arnold, U. S. A., and Lieut, F. M. Kennedy, U. S. A., and Lieut, F. M. M. M. M. olving film of the motion picture cam-

Work-a-day photographers, including Jimmy Hare of Collier's Weekly, Adrienne Duff of the American Press Association, Edward Shaw and Tracy A. Tisdell and jack-of-all-aerial-trades such as Rodman Law, also have lately been sought out by the hig film companies to take pictures where the ordinary moving picture photographer would balk at the risk engendered.

Unparalleled Realism.
Some time ago Leo Stevens, the

Enparalleled Realism.

Some time ago Leo Stevens, the aeronaut, and Tracy A. Tisdell, a moving pleture photographer, made an escausion for the purpose of taking pictures to be exhibited at the now defunct Dreamland, Coney Island. Their baloon started from the Bronx in first rate shape and all went well until it hit the Pallsades opnosite Yankers.

Tisdell kept his camera going from the time the car of the balloon hit the crest of the Pallsades until, 10 minutes later, the balloon collapsed in the Hudson river. For realism the pictures sad no equal at the time, as Tisdell snapped both the desperate efforts of Stevens to anchor his craft and the gyrations of the balloon liself as it leaped along

of the balloon itself as it leaped giong the cliff's side and dragged through the brush along the river hank. Speaking of his experience with a moving picture camera in the air resently Licut. F. M. Kennedy said:

"We started from College Park, Washington, in the afterneon with the idea of carrying out a minute scouting trip. I had the motion picture machine a small contrivance as easy to onera small contrivance as easy to operate as an ordinary camera—and Lieut. Arnold guides the biplane.
"When we had reached 1,500 feet and

over the road. I held the camera in his position during the major portion of the flight, shifting it only a little to the right and left to get the topog-

to the right and left to get the topography in general.

'The only difficulty encountered—and it is one easily remedied—was in definitely deciding just how much territory we were covering. There was no finder in the camera, and it was therefore impossible to sight it as one would if taking an ordinary photograph.

The light struck slantingly, and, as the camera was shaded, should have brought the hills and hollows below us into splendid relief. This is the first extended trip I have made with a moving picture machine on an airship, if the pictures I took prove to be a success undoubtedly the scheme will be followed up and come into general assumed to the second control of the pictures of the scheme will be followed up and come into general assumed to the second control of the scheme will be followed up and come into general assume the control of the scheme will be selected.

followed up and come into general assent in obtaining topographical maps for

government purposes."

Some Pertions Instances.

Frank T. Coffyn just a year ago went under and over Brooklyn bridge with a moving picture operator from the Vitagraph company. Coffyn snapped New York's skyscrapers and made photographs of the statute of Liberty while flying over the harbor en two succeeding occasions, when, by means of a special device, he was enabled to manipulate the camera withabled to manipulate the camera with-

out the assistance of a licensed and ing operator.

Coffyn toe two one-tweifth horse-power six voit electric motors, connected them up with a chain drive, and operated the shutter and recling mechanism of the camera by means of worm gear. The unexposed film was rolled off before the lense from one of the boxes. The film was then wound up in the other box. Coffyn operated the camera by means of a switch, which he opened and closed. The storage batteries were fastened to the passenger's teries were fastened to the passenger's called "The Retreat from Moscow," and the viberrowed" 10,000 troops from the care who appear in it.

Phillips Ward Page, of Brookline,
Mass, early last summer made a flight
over the North Atlantic squadron anchored off Beverly, Mass, with a movchored off Beverly, Mass, with a moving picture machine aboard, and took
photographs of the decks of Uncle
Sam's men-o'-war. Mr. Page was accompanied by Edward Shaw, who handied the crank of the camera.

Shaw at first operated his camera by
hand, but during subsequent flights the
camera was geared to and run by a
motor. Mr. Page started the film revolving and stopped it at the running
off of the reel by means of a switch attached to one of the uprights. On one
of his flights Mr. Page took up Mr.
Hemment, who then had recently returned with Paul Rainey from a hunting trip in Africa. Mr. Hemment took
some fine pictures of a flock of ducks
which raced Mr. Page's plane for several miles. On his descent Mr. Hemment was congratulated by Paul Rainey, who has since exhibited the pictures.

Moving pictures taken from an acco-

clane, unlike those taken from a train or automobile, are remarkable for their or automobile, are remarkable for their steadiness. Mr. Shaw, while flying with aviator Robert G. Fowler on the latter's coast to coast trip, took some pictures of Louisiana in which there is a total absence of "swaying." Hundreds of feet of film were run off in which the views taken did not shift a quarter inch in the perspective. The picture machine was equipped with a device which completely did away with the vibration of the aeroplane engines and to a great extent the steadiness of the views when projected was due to the stabilizing mechanism.

The Aviation Film company put Mr. Fowler under contract to carry a camera on his aeroplane from Texas to New York. Israel Ludlow and Robert L. Buird invented the apparatus by means of which Mr. Fowler was later enabled to operate the camera alone.

sabled to operate the camera alone, he device turned the crank of the amera with power transmitted directfrom the aeroplane motor. By means of this appliance aviators (Continued on Next Page.)

#### Movie Mentions

Selig has reproduced his greatest

Selig has reproduced his greatest comedy hit, "The Cowboy Millionaire." It was told in one real three or four years ago, but the new picture is in two full reds. It is a thrilling picture in addition to being a comedy.

Florence Turner, the dainty little woman who charmed millions through the medium of the Vitagraph films, has retired. She may play a short engagement in vandeville.

A number of preminent photoplay stars are known in El Paso. J. P. McGowan, producer and leading man of one of the Katem companies, was a raliroad clerk in a local raliroad office and played bits in the Orpheum stock company when it held forth under Will R. Winch's direction at what is now the El Paso theater. Ruth Roland, Edgar Jones and Mr. McGee, of the Vitagraph, also filled stock engagements here. Buth Roland, Fred Church of the Essanay company, and Kathlyn Williams, of the Selig company, have relatives here.

Kathlyn Williams, the beautiful and daring leading woman for Selig, is being boosted by her friends as the most perfectly formed woman in motion pictures. She is slightly larger in every way than the Venus di Milo, but her proportions are said to be correspondingly symmetrical.

The Herald's old friends, Mutt and Left, will be seen again soon in the Pathe Weekly. They do not appear every week, but just at intervals. Those who saw them recently at the Wigwam and Bijou laughed themselves tired.

Two companies of photoplayers are going around the world. One is headed by the most popular leading man (according to a general vote). Maurice Costello, and the other by the veteran picture maker, Gaston Molies. Both are going from west to east. The Melles comp. hy has released some of their pictures, but none of the Costello productions has yet been announced. The Bijou recently showed Melles Tahlii pictures.

Pathe Freres must employ a hyno-tist. They have produced a picture

camera by means of a switch, which he opened and closed. The storage batteries were fastened to the passenger's sat next the engine.

On this last flight Coffyn attempted to descend at too steep an angie. In the volplane the camera broke loose from its base, because of its weight, and slipped off into the East riper, a thousand feet below. When it landed in the river it cast up a miniature guyser. Mathematicians may figure out what it would have done to a ferryhous had it struck one while failing at the frightful velocity it attained in the last half hundred feet of its downward drop.

Phillips Ward Page, of Brookline, Mars., early last summer made a flight over the North Atlantic squadron anchored off Beverty, Mass., with a moving pleture machine aboard, and took photographs of the decks of Uncle Sam's men-o'-war. Mr. Page was accompanied by Edward Shaw, who handled the trank of the camera.

will sign up with Frohman for pictures.

Well, well. What do you think of this? The Biograph, which for years has refused to answer inquiries as to who their players are and who would not tell the names of even their leading men and women, has sent all of the licensed houses posters showing the pictures of all of their players with the name under each photo.

William J. Burns, the detective, is the latest celebrity to "fall" for the moviles. He has taken part in a big production called "The Exposure of the Land Swindlers." It is a story of official Washington.

#### REFUSES \$80 A HEAD FOR HIS FED CATTLE

San Angelo, Tex., March 22—C. H. Rathle, who was the subject of a great deal of comment in stock circles last week, because of the remarkable cattle deals he made in Kansas City, where he sold his ensilags fed steers at record prices, has shipped nine more cars of steers to the market. There were 200 head in the lot.

The cattle were consigned to the National Livestock Commission company in Kansas City, with Fort Worth privileges. Before the cattle were loaded here, P. B. Clark offered Mr. Bathle 350 a round for the stock and was refused.

#### CITIZENS' TICKET TO OPEN HEADQUARTERS

Headquarters will be opened Monday by the Citizens' ticket organization in the old Welch building on Stanton street. The headquarters will be opened with a house warming and speeches by the leaders of the Citizens' ticket movement. Will Heapd is in charge of the headquarters, which are located on the second floor of the Welch building.

### Charming Picture Actress Who ls Strong For Suffrage Cause

Thinks Women Should Share | proudly announces herself to be a Call-AllHonors With Men-But She Likes Fine Clothes.

Santa Barbara, Cal., March 22—Pauline Garfield Bush is an ardent suffraget, helleving women can and should do just anything a man can do.

That is, she thinks a woman's brain and ability rank right alongside, not a few feet behind, a man's.

This is "going some" for a real sure enough actress whose life has been spent wearing beautiful clothes and winning the plaudits of an admiring public.

Maybe this notion of hers is the rea-

Maybe this notion of hers is the rea-son Miss Bush left the Los Angelas Belasco Stock company to join the American Film company at Santa Bar-bars, Cal.

hars, Cal.

Anyway, she went, and now she's the leading woman, don't you know, doing pretty much everything the men in the company attempt, too.

Popular With Both Sexes.

If anyone doubts just how popular this girl has grown, it's only necessary to listen to some of the comments of the young men and the exclamations of the girls when Miss Bush comes into the picture at the nickel show.

"Oh. I just love her!" sing the girls in chorus.

formian.

Hissardons Riding Stant.

In a recent picture, in which shap played opposite to Warren Kerrigan. Miss Bush dared a hazardous riding stunt Kerrigan, iding at full gallop, swept past her, grabbed her by one arm and swung her onto the saddle behind him, without slacking speed.

That's the way it focked, But in really Kerrigan didn't do all the work or take all the chance. Miss Sugh stood ready to leap, and the minute he caught her arm she immped toward the horse, practically lifting herself into the saddle. It took the ability which she says women as well as men possess to play women as well as men possess to play her part in the difficult scene.

That scene is in "The Road to Success." Some of her other pictures are "The Girl of the Manor," "The Power of Love," "Nell of the Pampus," and "Maiden and Men."

FAMOUS PEOPLE

World famous personages have posed If anyone doubts just how popular this girl has grown, it's only necessary to listen to some of the comments of the young men and the exclamations of the girls when Miss Bush comes into the picture at the nickel show.

"Oh. I just love her!" sing the girls is chorus.

"There's my girl!" whisper the boys Maybe those who have never seen her. except on the screen, would like to know she is 5 feet 4 1-1 inches tail, weighs 130 pounds, has brown hair and hurges Johnson, 10 of Americas famous authors and artists, wrote a play, a farree, then they staged and enacted it themselves.

It is the first time in history that so hary eyes. many famous personages have ever ap Her parents were English, but she peared in the same film, it is stated.
